

**Maldives Electronic Services Company Private Limited (MESCO)** is the leading private sector firm in electronic sales and services in the Maldives, incorporated in 1982. MESCO Service Centre, caters for 50% of the market share in electronics servicing, and continues to maintain the lead as a specialized subsidiary of MESCO.

### **MESCO Electronics**

As the agent for MOTOROLA two-way communication radio products, MESCO Electronics was recently awarded large government contracts for the supply of hand held radios and communication sets. MESCO is also the authorized dealer and service agent for TRIMBLE Navigation Limited FOR GALAXY TRANSCEIVERS.

## **SERVICE CENTER**

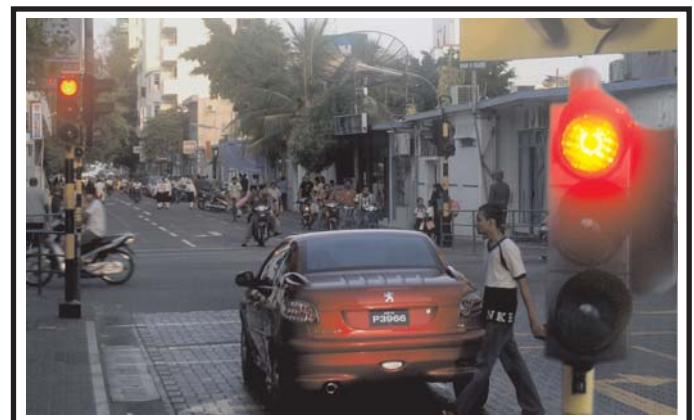

MESCO's customers range from those requiring installation of land and mobile communication systems, GMDSS marine communication equipments as well as the general household consumers using a variety of electronic equipments.

Our large corporate clients include the State Trading Organization, the biggest trading company in the Maldives, and Villa Hotels who own the largest chain of resorts in the Maldives. We also provide services to the Ministry of Defense and National Security and other government organizations.

MESCO has successfully completed many projects in Male', such as; Traffic Lights Project undertaken as the local agents for Phillips Singapore.

- Security Camera System in Maldives Ports Authority, to name a few.

## **WE CONTROL CITY**

# CABLE TV

A new subsidiary in the name of MALDIVES CABLENET Pvt. Ltd. was formed as the operational wing for this service. In 2003, Maldives CableNet (MCN) invested in a second MMDS service to cover the largest two southern atolls. Presently MCN distributes 20 channels and MESCO holds exclusive rights in the Maldives for ESPN, STAR SPORTS, CNN, CARTOON NETWORK, DISCOVERY along with other channels..

## FIBER GRID

LIGHTING THE LAST MILE

This year MESCO began investing in a Hybrid Fibre Coax Network to cover the capital city. The objective is to transform its Cable TV distribution in the capital city by expanding channel capacity, which is limited to 20 with MMDS, and by introducing value added services such as video-on-demand. Furthermore, the network is designed to carry high-speed internet, and intranet gaming and other broadband services. The network will be fully operational by mid-2005.
